COBO USA Inc founded in 2002 is a well-established local representation of the COBO group in North America with manufacturing, R&D, and logistics facility located in West Burlington Iowa, and Sales and Software Development Support in the Chicagoland area.

COBO SPA a multinational company founded in 1946 headquartered in Italy, is a leader for electrical, mechanical and mechatronics devices in the off-highway vehicle industry.

With 38+ product lines and more than 60,000 part numbers manufactured in USA, Europe and Asia, COBO is the ideal partner for customers that aim to ensure quality and tailored made solutions to the final users.

COBO invests heavily into R&D to always be an innovative supplier for its international customers in industries such as Agriculture, Earth Moving, Material Handling, Construction, Motorcycle, RV, Military & Truck / Trailers.

Since its establishment, COBO's strategy has been to focus on design and to produce innovative technologies and solutions in lighting, seats, CAN BUS and ISOBUS HMI, steering columns, steering wheels, integrated systems, ECU, IoT and connectivity devices.

COBO USA understands that flexibility and promptness to the quick and rapid changes of the market is the key to success, not only for us but also for our valuable business partners.

We are also aware that your needs for a specific component category may come up unexpectedly. For this reason COBO has created a quick order and quick delivery service "COBO Distribution Shop" for the main products we categorized as sensible.

You will always find at least 2 pieces per each part number readily available from stock. Our stock is firm, but flexible, in order to follow the industry trends needed.

Our logistic and sales team will be more than happy to assist you to start using our premium service!
